

BEYOND EQUIPMENT. COMPLETE PROJECT SOLUTIONS.

OUR END TO END SERVICES INCLUDE:

Dangerous Goods & Hazardous Chemical Consulting

Receive professional guidance on the safe storage, handling, transfer and management of hazardous chemicals and dangerous goods. We help identify compliance requirements and develop practical solutions that minimise risk while supporting efficient operations.

Site Audits & Compliance Assessments

Our comprehensive site inspections identify compliance gaps, operational risks and improvement opportunities. We provide clear recommendations to help your facility meet legislative requirements and industry best practices.

Council & Regulatory Applications

Navigating approvals can be complex. We assist with preparing and managing documentation for local councils, regulatory authorities and government agencies, helping streamline the approval process from start to finish.

Risk Assessments & Hazard Analysis

Protect your workforce and business with detailed risk assessments that identify potential hazards, evaluate operational risks and recommend effective control measures for ongoing compliance.

Engineering Drawings & AutoCAD Design

Our technical design team produces accurate AutoCAD layouts and engineering documentation for dangerous goods storage, fuel systems, chemical facilities and hazardous material installations.

Project Planning & Management

From concept through to completion, we provide expert project management for hazardous chemical storage facilities, fuel systems, warehouses and specialised infrastructure projects.

Fire Authority & Emergency Compliance

Ensure your facility is prepared with compliant fire protection documentation, emergency procedures, dangerous goods manifests, signage recommendations and authority application support.

Dangerous Goods Storage Design

We design compliant storage solutions for hazardous chemicals, fuels and dangerous goods across a wide range of industries, helping maximise safety, efficiency and operational performance.

From initial concept and engineering through to approvals, compliance and project delivery, A-FLO Equipment provides the expertise to ensure your project is completed safely, efficiently and in accordance with Australian standards.

ONE PARTNER. EVERY SOLUTION. NATIONWIDE.
