

# BLUEQUIP OCIO LEVEL INDICATOR SYSTEM

OCIO is the PIUSI s tank level indicator specifically designed for AdBlue thanks to its stainless steel probe. It gives a real time indication of the fluid quantity.

OCIO detects the static pressure generated by the fluid height by means of a tube inserted into the tank and displays the fluid level or volume. The system consists of:

- A tube for detecting static pressure: The tube end is inserted from the top of the tank and lowered down into the liquid until it touches the bottom.
- A control unit for displaying the level and managing the system. The unit is equipped with an intuitive, complete software and permits the connection of two alarm or lock devices.

READY TO USE inside the tank.

BUILT-IN DISPLAY

STAINLESS STEEL PROBE

## FEATURES & BENEFITS:

- Continuous monitoring
- Indication in height, volume, and filling percentage
- Economic solutions to electronically monitor the fluid levels inside oil & fuel tanks
- Probe tube length: 10M (can be extended up to 50M)
- High Accuracy: 1% of full scale
- Maximum and minimum level alarms
- Intuitive software managing procedure
- Easy installation and PC link-up option available
- Power supply: 240V/50HZ

## SPECIFICATIONS:

Brand	Bluequip
Dimensions	56x23x23
Weight	6 Kg

### PART NO.

FP-755140

OCIO Level Indicator LV/RS Output - Adblue
