

LUBESHOT REFILLABLE AUTOMATIC GREASE LUBRICATORS

Lubeshot Refillable Automatic Grease Lubricators are the most flexible grease dispensing lubricators on the market. They can be set to high, medium, or low configurations during dispensing making them the ideal choice for grease of any viscosity.

Avoid constant disposal expenses with our Lubeshot Refillable Automatic Grease Lubricators! This unit has an option for setting the grease dispense on high, medium or low which means you can use this for any grease viscosity & operating condition without changing the spring. The added adjustment allows you to control the intensity of the grease output. Designed & installed everywhere a point to be lubricated is present.

FEATURES & BENEFITS

- No battery or gas required
- Refillable via standard grease nipples
- No disposal expenses
- 4 feed rate settings
- Automatic
- High-strength transparent construction
- Applications: bearing, bushings, pumps, valves, cranes, elevators & turbines
