

BLUEQUIP SINGLE SKIN SLIMLINE ADBLUE TANKS

The Bluequip Slimline Eco Fleet is a single-skin bulk storage and dispensing tank designed for the safe and efficient storage of AdBlue®/ DEF and coolant. Engineered for indoor installations or use within a compliant bunded area, the slimline design maximises storage capacity while minimising floor space requirements.

Featuring an integrated lockable pump cabinet and complete dispensing package, the Bluequip Slimline Eco Fleet provides a cost-effective, reliable solution for workshops, fleet depots, service centres, industrial facilities and agricultural operations.

FEATURES & BENEFITS:

- Designed for the storage and dispensing of AdBlue®/DEF and Coolant
- Single-skin polyethylene construction for indoor or bunded installations
- Slimline footprint ideal where floor space is limited
- Lockable pump cabinet protects equipment from unauthorised access and weather
- Cost-effective solution for fleet and workshop fluid management
- Complete dispensing system supplied ready for installation
- Suitable for commercial, industrial, mining, transport and agricultural applications

STANDARD EQUIPMENT:

- 240V Electric Transfer Pump
- 6m Delivery Hose
- Automatic Dispensing Nozzle
- Automatic Nozzle Holster
- Digital Flow Meter
- Digital Tank Level Gauge
- Overfill Protection
- 2" Dry Break Fill Connection
- Leak Detection System
- Lockable Pump Cabinet
