

A-FLO HIGH-LEVEL ALARM (LOA-IS)

The A-FLO LOA-IS High Level Alarm is a battery-operated overflow prevention device designed to provide both audible and visual alerts when liquid levels reach a predetermined point in a tank. Ideal for fixed, remote, and mobile storage applications, the LOA-IS helps operators prevent costly overfills, environmental incidents, and product loss.

Featuring a powerful 110 dB alarm, the unit is easily heard in busy industrial environments and is built with a weatherproof design for dependable outdoor operation.

FEATURES & BENEFITS:

- Suitable for Diesel, Oil & AdBlue®
- High-visibility visual warning indicator
- Powerful 110 dB audible alarm
- Weatherproof construction for outdoor applications
- Adjustable sensor level for flexible installation
- Direct tank mounting design
- Low battery warning function
- Simple battery-powered operation
- Ideal for mobile, remote, and bulk storage tanks

SPECIFICATIONS:

Suitable Fluids	Diesel, Oil & AdBlue
Sensor Type	Float Sensor
Alarm Type	Audible & Visual
Alarm Volume	110 dB
Power Supply	6 VDC (4 x AAA Batteries)
Mounting Connection	2" BSP (Standard Fitting Supplied)
Operating Temperature	-20°C to +60°C
Construction	Weatherproof
Dimension	70 mm (L) × 25 mm (W) × 20 mm (H)
Weight	3 kg

PART NO.
