

A-FLO HIGH-LEVEL DIESEL/OIL TANK ALARM

A-FLO's High-Level Alarm is a reliable solution for preventing overfills in diesel and oil storage tanks. Designed for constant monitoring, this compact and weatherproof unit ensures safety and compliance in fuel management systems. Ideal for steel or plastic tanks, it works with diesel, heating oil, biodiesel blends (up to B100), oils, and water.

FEATURES & BENEFITS:

- Constant Monitoring – Unlike “push-to-test” alarms, this unit continuously monitors tank levels.
- Versatile Compatibility – Suitable for steel or plastic tanks and multiple liquids.
- Battery Operated – Includes PP3 battery with up to 2-year life (tested weekly).
- Weatherproof Design – Rated IP65 for outdoor use.
- Compact Size – Only 90 mm square, perfect for confined spaces.
- High-Power Alarm – 97 dB at 1 m for clear audible warning.
- Visual Alert – Flashing light on top of the unit.
- Mute Function – Silences sounder while light continues flashing.
- Float Switch Included – Comes with 5 m cable for easy installation.
- Made in UK – Guaranteed highest quality.
