

OCIO LEVEL INDICATOR

The OCIO Tank Level Indicator is an innovative system for monitoring the fluid level inside tanks.

The system detects the static pressure generated by the fluid height by means of a tube inserted into the tank which displays the fluid level or volume.

A tube for detecting static pressure: The tube end is inserted from the top of the tank and lowered down into the liquid until it touches the bottom.

A control unit for displaying the level and managing the system. The unit is equipped with an intuitive, complete software and permits the connection of two alarm or lock devices
