

OILTRACK WIRELESS OIL MONITORING SYSTEMS

FEATURES & BENEFITS:

- Up to 250 dispense points
- Up to 16 oil types
- Record every drop
- Optional integrated ticket printer
- Up to 250 users
- Up to 90 meter radio frequency
- Prevent oil from disappearing without being allocated to a job, and reduces labour required with a manual charge system.
- Connection to DMS compatible
- No changes are required to existing systems or pipework
- No possible cable error
- Easy to install or retrofit
- Ideal for mobile trolley applications
- Extremely versatile & user friendly
- Significantly reduces labour associated with a manual system which also causes an interruption for the technician & a loss of focus on the actual job
