

# OIL EVACUATION SYSTEM

With our extensive range of Waste Oil Drainers and Evacuation Pumps, we can provide solutions to handle your waste oil with ease using our Oil Evacuation Systems.

In small, medium, or large workshops this is a key area that is overlooked and can affect your efficiency and result in spills that can be prevented. Whether in a pit or in a workshop, we have the right waste Oil Evacuation System

## FEATURES & BENEFITS:

- Easily and efficiently empty waste oil drainers
- Uses a RAASM Diaphragm Pump to siphon the oil from the waste oil drainer tank
- Prevents oil spray and spillage
- Can be mounted onto walls, hose reel gantries or directly onto the bulk waste oil tank
- Supplied with a Wall Mount Bracket, 2M Suction Hose Kit and Quick Disconnect Fittings
- Withstands the rigorous of daily operations
- Suitable for small, medium and large workshops
- 10 Year Warranty
- Our Oil Evacuation System is available in 2 different models based on the pump kit type
- **Note: Waste oil drainer sold separately**
