

# SPILL CONTAINMENT CADDY

A-FLO's Spill Containment Caddy allows for easy loading, moving, locating, and dispensing of drums in workshops. This drum-transporting caddy is a carefully designed unit that avoids unnecessary spills or injuries.

## FEATURES & BENEFITS:

- Easy loading, moving, locating, and dispensing
- This drum transporter is a carefully designed unit that avoids unnecessary spills or injuries. 205L drums are easily attached, tilted, and wheeled into position by one person
- The transporter has a large 230L sump that can easily contain all the contents of the drum if it should spill or leak
- Constructed with tough polyethylene, the caddy cannot rust or corrode.
