

FLUIDLINK®

SNAP-TL BOWSER

The FLUIDLINK Snap-TL Bowser is an economical dispensing system that supports diesel and AdBlue pumps, with flow rates from 30 to 120 litres per minute. Complete with pump, flowmeter, nozzles switch, and a cloud connected ATG sensor, the SNAP-TL is quick and easy to install. The LCD display shows transaction amount, total litres pumped and tank level, making it super easy to use.

APPLICATIONS:

- Primary industries
- Infrastructure industries
- Service Sector
- Industrial Sector

SPECIFICATION:

Supply Voltage:

240V

Operating Temperature Range:

-25°C to 55°C

Humidity Range:

95% non-condensing

Ingress Protection Rating (IP):

IP65 (when appropriate glands are used)

FEATURES & BENEFITS:

- Economical low to medium flow dispensing solution
- Stainless steel construction
- Clarity, our real-time (online) intuitive management software
- Multiple mobile communication options for optimum coverage range
- Cloud-connected tank gauge for real-time monitoring
- Compatible with various industry-standard pump types and configurations, including DEF (AdBlue) and Diesel
- LCD display showing transaction amount, total litres pumped, tank level, nozzle switch state, and cloud connection status
- Flow meter & pump control connections to allow easy connection to fuel management systems
- Inlet & outlet 1" BSP
- Designed for easy installation and troubleshooting
- Compatible with Fluidlink flow meters and tank gauging
