Service & Maintenance

As a family-owned and Australian-owned business, we’re built on a foundation of trust, commitment, and shared values, principles that guide every solution we deliver and every relationship we build. With all our operations managed in-house, we maintain full control over quality, service, and responsiveness. We don’t just provide products, we deliver tailored solutions that meet the unique needs of every client. Our people are at the heart of everything we do, and it’s through this unity that we consistently exceed expectations and drive success together.

Driven by Trust. Defined by Reliability. Powered by Results.

For over three decades, A-FLO Equipment has delivered performance-driven fluid management solutions across Australia's automotive, transport, mining, agriculture, and industrial sectors. We're proud to be a trusted partner to leading businesses, OEMs, service providers, and workshop operators nationwide.

With a focus on safety, compliance, and efficiency, A-FLO provides best-in-class products, purpose-built systems, and full-service workshop solutions that stand the test of time. From custom-built tank systems to turnkey workshop fitouts, our team is committed to driving operational performance through innovation, expertise, and nationwide service.

Our clients include some of Australia's most recognised names in transport, fleet, fuel, agriculture, and mining, because **they know they can rely on A-FLO to deliver.**

Complete Capability, One Partner

A-FLO Equipment is driven by four core pillars which centre around refuelling & lubrication. Providing integrated, end-to-end support across every aspect of your fluid handling & operational needs.

GENERAL RANGE PRODUCTS

A-FLO's General Range delivers one of Australia's most comprehensive selections of fluid handling, storage, and dispensing equipment. Designed for reliability, safety, and seamless integration, this portfolio covers everything from pumps, reels, and tanks to filtration and waste systems. Backed by decades of industry expertise, fast national delivery, and expert support, our General Range ensures scalable, practical solutions for workshops, fleets, and industrial operations, available to quote and order online with ease.

[See pages 12-13](#)

WORKSHOP FITOUTS & INSTALLATIONS

We don't just supply products, we build high-performance workshops from the ground up. A-FLO's Workshop Fitouts & Installations service combines turnkey project management, premium equipment, and custom-built systems tailored to your site's layout and operation. From concept and design to compliance, fabrication, and final install, we deliver future-proof, streamlined workspaces for leading automotive dealerships, mining operations, and transport depots nationwide.

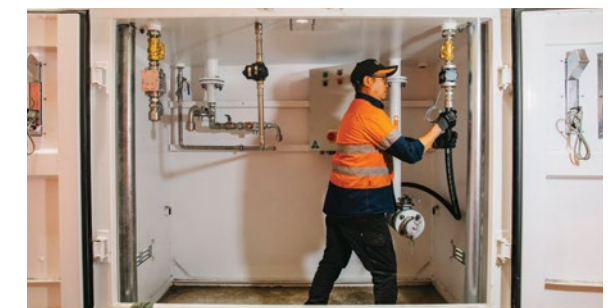

[See pages 14-17](#)

TANKS & SYSTEMS

Fuel and fluid storage starts here. A-FLO's Tanks & Systems division engineers fully compliant, bundled and customisable solutions for above and below-ground use. Whether it's diesel, AdBlue, oil, waste, or water, we design and deliver tanks that meet Australian standards and client-specific needs. With in-house specialists and full project capability, we provide complete turnkey systems for bulk handling, remote refuelling, and multi-fluid integration across all sectors.

[See pages 18-21](#)

SERVICE & MAINTENANCE

A-FLO's Service & Maintenance programs are designed to support the long-term performance of your equipment, from routine tank inspections and compliance testing to pump repairs, replacement parts, and preventative servicing. Our national field team ensures issues are addressed quickly, safely, and with minimal disruption, reducing downtime, extending equipment life, and protecting your investment over time.

GENERAL RANGE

A complete range of fluid handling, storage, & dispensing solutions for Australia's industries.

Built to perform, stocked to deliver, A-FLO's General Range offers a complete portfolio of proven fluid management products for every workshop, fleet, and industrial site. From diesel and oil transfer pumps to reels, nozzles, filtration systems, meters, bundled storage, lubrication equipment, fuel tanks, waste oil gear, and full control systems, our selection is engineered for performance, reliability, and integration.

With over three decades of hands-on experience across mining, automotive, transport, agriculture, construction, and service industries, we know what works, and how to make it work for you. Every product we supply is backed by practical knowledge, installation support, and nationwide service.

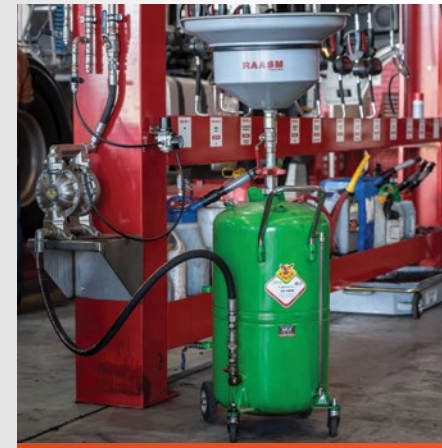

We've curated a range of market-leading brands and global innovations that meet the highest standards of quality and durability. Whether you need a single part or a full-scale system, our in-house experts are here to guide you. We also offer complete custom builds and project kits designed from our General Range.

Fast lead times, responsive customer support, and nationwide distribution ensure your equipment is delivered quickly and efficiently, with quoting and ordering made easy through our online dealer platform.

WORKSHOP FITOUTS & INSTALLATIONS

Your ultimate
partner in
creating the
perfect workshop
environment.

Specialising in automotive, public transport, heavy vehicle, and mine site workshops, A-FLO Equipment delivers customised workshop fitouts and installations with nationwide coverage, ensuring accessibility to every corner of Australia. Our in-house design team collaborates closely with clients to develop tailored workshop solutions that are operationally efficient and suited to their specific requirements. A-FLO focus on optimising workflow, safety, and functionality to create workspaces that enhance productivity and support long-term business goals.

From the initial consultation and design phase through to procurement, installation, and commissioning, we provide full project management to ensure every fitout is delivered on time, within budget, and to the highest quality standards. Our hands-on approach means our clients have a single point of contact throughout the process, simplifying communication and coordination. We understand that every workshop is unique, so our solutions are fully customised to accommodate your equipment needs, space constraints, and operational demands.

By combining industry expertise with innovative design and reliable execution, A-FLO Equipment ensures your workshop is not only fit for purpose but also adaptable for future growth and evolving technologies. Whether our clients are upgrading an existing facility or building a new one, we work with our clients every step of the way to deliver a workspace that drives efficiency and supports their operations.

CASE STUDY

RDO TOWOOMBA

INDUSTRY

Agricultural
Workshop

Complete Workshop Transformation

RDO Toowoomba engaged A-FLO to deliver a fully integrated workshop solution tailored to the demands of agricultural machinery service. The project included the installation of a truck hoist, hybrid hose reels for oil and grease, bulk fluid storage tanks, and an advanced waste oil evacuation system. A-FLO's design prioritised efficiency, technician safety, and long-term durability, providing RDO with a turnkey workshop fitout that supports high-volume service throughput and compliance.

CASE STUDY

BALLARAT ISUZU

INDUSTRY

Truck
Workshop

Future-Proofed Dealership Workshop

To accommodate Ballarat Isuzu's growing service demands, A-FLO designed and installed a scalable workshop layout featuring a pre-fabricated drop-in service pit, premium fluid handling systems, bulk oil tanks, and a centralised waste management solution. This fully integrated setup enhanced technician workflow and provided a modular foundation for future expansion, ensuring the facility is equipped to grow in line with the dealership's operational needs.

CASE STUDY

JARVIS GROUP
BRIGHTON SA

INDUSTRY

Automotive
Workshop

Custom Workshop Fitout Across Multiple brands

Jarvis Group partnered with A-FLO to fitout a new dealership workshop that could service multiple OEMs under one roof. The custom solution featured multi-fluid dispensing systems, workbench integration, overhead service booms, and environmental systems for waste oil and coolant recovery. The end result was a seamless, brand-consistent workshop environment that maximised productivity and aligned with Jarvis' strong reputation for quality across its franchise network.

TANKS & SYSTEMS

Diesel & AdBlue® tanks custom designed & expertly manufactured to drive cost savings & support operations.

At A-FLO Equipment, we supply a comprehensive range of Self Bunded, Containerised, and Single Skin Bulk Diesel Tank Solutions that are both environmentally friendly and cost-effective. Recognising that diesel is often the second largest expense for businesses after wages, our expert team works closely with clients to identify and deliver the optimal fuel storage and refuelling systems tailored to their specific diesel needs. Every solution is designed with efficiency, safety, and compliance in mind, helping you reduce costs and improve operational reliability.

Our in-house production team manages every stage of the tank fitout, ensuring precision manufacturing and quality control at every step. From initial consultation and custom design to fabrication, installation, and ongoing support, we provide turnkey solutions that simplify your project management and give you peace of mind. Our Diesel and AdBlue® tanks are assembled by our production team, where our clients benefit from local expertise, faster lead times, and superior product durability suited to Australia’s demanding environments.

We understand that every business has unique operational challenges, where we work collaboratively with clients to deliver a refuelling system that matches their site requirements and future growth plans. Whether it’s bulk fuel storage for mining operations, transport fleets, or agricultural applications, A-FLO Equipment is the trusted partner for innovative, reliable, and compliant fuel management systems.

CASE STUDY

WILLIAM RIVER STEEL

INDUSTRY

Massive Mine Site Installation

MACH Energy Australia Pty Ltd operates at the Mt Pleasant mine site in rural New South Wales. A-FLO Equipment delivered an advanced temporary lubrication facility designed to meet their extensive operational needs. This comprehensive fitout included the supply and installation of a Lubricant Storage Tank Farm, consisting of a 68,000L Waste Oil Tank, a 5,000L Containerised Slimline Tank, a 23,000L Containerised Slimline Coolant Tank, a 10,000Kg Grease Tank, and two Multi-Compartment Lubricant Tanks.

CASE STUDY

LINFOX WILLAWONG

INDUSTRY

Refuelling Solution for a Nine-Hectare Facility

Linfox Logistics built a warehouse in Willawong, QLD. This warehouse is a hub for Linfox customers and the state head office for the Linfox Queensland team. The A-FLO Projects Team designed and delivered a FUEL TAINER FT56/7 Diesel and AdBlue® Combo Tank with an integrated Compac Online Fuel Management and Tank Gauging System. A-FLO Equipment delivered the project on time and within budget.

CASE STUDY

SYMAL GROUP

INDUSTRY

Construction

Transportable & High-Volume Refuelling Options

Symal Group specialises in major and complex civil infrastructure projects. The A-FLO Equipment team delivered two 2,200L Diesel trailers and a 13,000L FUELBOX. The trailers included a 12V BL Pump Kit, Hose Reel and a 120W Solar Panel on each to assist in running the Everlink Ltd Fluid Management System. The FUELBOX was fitted with a single hose 100L/minute standard pump package and an Everlink Ltd Fluid Management System. All units included custom signage and fire extinguishers to complete the package.

CASE STUDY

JJ'S WASTE & RECYCLING

INDUSTRY

Waste Management

Seamless Operations & Refuelling

JJ's Waste and Recycling are Australia's leading waste management company providing waste disposal, treatment and recovery solutions to a range of industries. The A-FLO Equipment team designed and delivered a cutting-edge refuelling and dispensing system, including underground pipework, electrical, and 4 remote dispensers, the installation featured an FT95/10 FUEL TAINER Diesel AdBlue® Tank, with 94,710L SFL Diesel and 10,000L SFL AdBlue. The FLUIDTRACK FMS, equipped with 8 Diesel Nozzles and 8 AdBlue® Nozzles, ensuring seamless operations.

OUR CAPABILITIES

Preventative maintenance programs

Workshop equipment servicing

Tank & fluid system servicing

Emergency breakdown response

Site audits & safety inspections

Compliance testing (EPA, AS1940, etc.)

Hose reel, pump & meter servicing

Waste oil system checks & evacuation

Equipment calibration & pressure testing

Filter replacements & line flushing

Remote monitoring & system diagnostics

OEM warranty servicing

Spare parts supply & installation

Safety system checks & compliance reporting

Nationwide technician network

MAINTENANCE PROGRAMS

Maximising uptime. Minimising hassle.

At A-FLO, we don't just supply equipment - we ensure it stays running at peak performance. Our national Service & Maintenance team keeps your operation compliant, safe, and productive with comprehensive, proactive support.

Maintenance Programs are built to reduce unexpected downtime and extend the life of your equipment. Through scheduled servicing and thorough inspections, we help you avoid costly repairs and maintain compliance with relevant standards.

You choose the service frequency: monthly, quarterly, or annually. We will take care of the rest.

NATIONWIDE COVERAGE, LOCAL RESPONSE

With fully equipped service vehicles and technicians across Australia, we respond fast - wherever you are. We're here to keep your business moving, from metro depots to remote mining and agricultural sites.

- Tank & Workshop Maintenance Programs (see page 26-27)

SERVICE YOU CAN COUNT ON, PERFORMANCE YOU CAN MEASURE

CUSTOM IN-HOUSE DESIGN & ENGINEERING

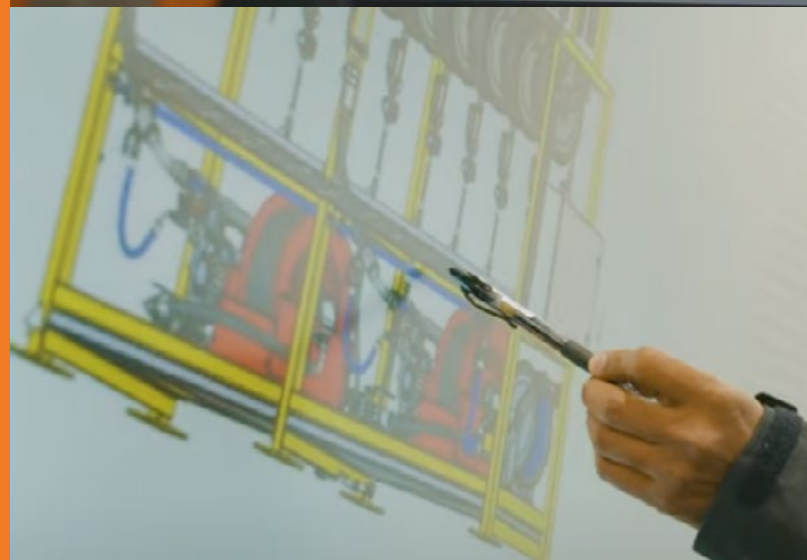

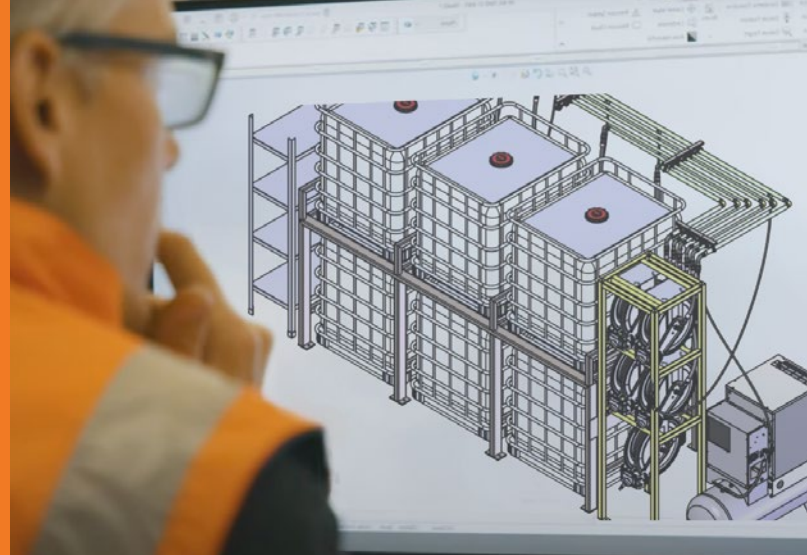

From concept to completion: Custom designed workshops, fluid systems, & storage solutions.

A-FLO's in-house design and engineering team is the backbone of our ability to deliver tailored, high-performance solutions across diesel storage, customised lubestores, refuelling systems, and complete workshop fitouts. With deep industry knowledge and technical expertise, our team works collaboratively with clients, project managers, and installation crews to ensure every solution is both functional and future-ready.

From concept to completion, we take the time to understand operational needs, site conditions, and compliance requirements, designing systems that are not only fit for purpose but optimised for safety, efficiency, and long-term performance.

Whether our client's are building a new depot, upgrading their refuelling infrastructure, or fitting out a complex workshop, our design and engineering team ensures every element is considered, coordinated, and customised to their exact specifications and expectations.

By managing everything in-house, we maintain full control over quality, timelines, and integration-ensuring a smooth project delivery and a solution that adds real value from day one.

Our End-to-End Process

1

Discovery

We begin by understanding your application, site conditions, compliance needs, and future growth plans.

2

Planning & Consultations

Our team assesses your layout, environmental and regulatory requirements, and efficiency goals to develop a tailored concept.

3

3D Design & Engineering

Using CAD and 3D modelling, we map out the entire solution from service bay layouts to tank sizing and pump placement.

4

Fabrication & Fitout

All major components are custom manufactured or modified in-house to specification - including tanks, pipework, brackets, reels, and frames.

5

Delivery & Installation

Our national installation team manages logistics, civil works (where required), equipment integration, and handover with minimal disruption.

6

Ongoing Support

We provide after-sales servicing, spare parts, system upgrades, and compliance checks to keep your investment protected.

TESTIMONIALS

Real stories. Proven results.

Trusted by industry leaders across Australia, A-FLO's clients value our reliability, expertise, and commitment to long-term support. Here's what some of them had to say.

North East Group

We embarked on the daunting task of constructing our new 36 bay Truck workshop & maintenance facility at North East Isuzu.

A-FLO understood our requirements, presented options that best suited our needs and provided a cost-effective solution was second to none. Friendly, respectful, on the ball, flexible and most importantly honest and easy to deal with each step of the project. Design excellence, project delivery excellence and a great bunch of guys to work with made this project an absolute winner for North East Group."

SURESH MILLAR

Group Service Manager - North East Group

The A-FLO team were a pleasure to deal with.

Clear, precise, very professional and delivery was on-time. The remote monitoring and tracking is the best we have ever seen and extremely easy to use. The follow up service and maintenance is always completed with minimal fuss."

DAVID BULL

Director - Bull Brothers Earthmoving

We engaged A-FLO Equipment to design a new workshop for our Croydon facility.

Very easy to work with and the workshop was delivered on time with the highest quality equipment fitted. Our new workshop is very efficient and we are very pleased with the outcome. A-FLO's workshop fit outs are second to none and I would highly recommend them for anyone thinking of upgrading or planning a new workshop project."

JIM GAUCI

Facility Manager - Ventura
