

# MAKING EVERY DROP COUNT

## FLUIDLEV SOLAR POWERED GATEWAY ATG

ultraflo

FUELCUBE

FUELSHOT

FL-826331

This gateway is supplied without a ATG level sensor attached and acts just as a gateway for other devices. The FLUIDLEV gateway allows other LoRa and BLE sensors to communicate with the cloud software. This lowers cost for multiple sensor installations as there is only one cloud connection charge and a much smaller sensor charge. This makes multi-tank installation very cost-effective to monitor.

### Specifications

- Up to 10 LoRa sensors can be wirelessly attached to the headend.
- LoRa device range is approximately 500M line of site.
- Solar power supply - must be located in a position it gets sun all day without shadow.

### Part No.

FL-826331	FLUIDLEV Gateway 240V Powered ATG with No Probe (Up to 10 FLUIDLEV LB Series Units)
