MAKING EVERY DROP COUNT

Continuous tank level monitoring. OCIO detects the static pressure generated by the fluid height by means of a tube inserted into the tank and displays the fluid level or volume. The system consists of:

• A tube for detecting static pressure: The tube end is inserted from the top of the tank and lowered downinto the liquid until it touches the bottom.

• A control unit for displaying the level and managing the system. The unit is equipped with an intuitive, complete software and permits the connection of two alarm or lock devices.

Part No.	Description
FP-75510D	OCIO Level Indicator LV/RS Output

Features & Benefits	
Continuous metering	
 Indication in height, volume and filling percentage 	
Maximum and minimum level alarms	
High accuracy	
 Intuitive software managing procedure 	
Easy installation	
PC linkup option
